DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 8, 2001 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 20 and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is not clear what is meant by the term "process specific". Are not all abrasive tools "process specific"?

Claim Rejections - 35 USC § 102

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

5. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Art Unit: 3724

6. Claims 1, 3, 8, 10, 12, 16, 20 and 21 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Cote et al, '106, as set forth in paper no.15, mailed August 15, 2000. As regards new claim 21, as Cote et al discloses that the underlying layers and the overlying layer are connected, then they must work in conjunction.

7. Claims 4, 9 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cote et al, '106, as set forth in paper no. 15, mailed August 15, 2000.

Response to Arguments

8. Applicant's arguments filed August 8, 2001 have been fully considered but they are not persuasive. Again, applicant's attention is directed to col. 8, lines 7-27 of '106. Disclosure is clearly set forth that the underlying pads are of different hardnesses. Inherently, different pad hardness results in different pad thicknesses when in use. Applicant has not provided any evidence or support from '106 that the overlying pad is not uniform and homogeneous in the embodiment of figure 4b. Applicant has not specifically pointed out any disclosure in Cote et al that would support his contention that Cote et al does not anticipate/make obvious applicant's claimed invention. Applicant has reiterated his argument that Cote et al does not disclose his claimed invention, but does not provide any evidence to support the argument.
